

COMPLIANCE COMPONENT

Last Updated: 8-3-05

DEFINITION							
<i>Name</i>	Ethnicity Code Table						
<i>Description</i>	This document contains the basis for the creation of an ethnicity data code table standard for the classification of hispanic and non-hispanic people. People who identify their origin as Spanish, Hispanic, or Latino (of any race) are of hispanic origin and all others are not. Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States.						
<i>Rationale</i>	Provides a simple set of guidelines in which ethnicity data code table elements can be uniformly defined, coded and maintained thereby allowing integration and interaction between state systems within Missouri regarding hispanic origins. The code table does NOT address all ancestry issues or types. Ancestry refers to a person's ethnic origin or descent, "roots," heritage, or the place of birth of the person, the person's parents, or their ancestors before their arrival in the United States. Some ethnic identities, such as Egyptian or Polish, can be traced to geographic areas outside the United States, while other ethnicities such as Pennsylvania German or Cajun evolved in the United States. Also, If a person uses a religious affiliation for ancestry, that response is typically grouped as "other."						
<i>Benefits</i>	<ul style="list-style-type: none">• Provides a standard for classifying and coding ethnicity data within the state of Missouri• Eliminates numerous variations each state agency may use when defining ethnicity data

COMPLIANCE DETAIL							
<i>State the Guideline, Standard or Legislation</i>	<p>The Census Bureau records 86 different ancestry groups and has a coding schema for that grouping. We propose that State agencies shall use the following minimum values for the ethnicity related to hispanic origins. These descriptions and codes are:</p> <table><tr><th><u>EthnicityCode</u></th><th><u>EthnicityDescriptionText</u></th></tr><tr><td>400</td><td>Hispanic/Latino Origin</td></tr><tr><td>450</td><td>Non Hispanic/Latino Origin</td></tr></table> <p>For the related element definition standards see Compliance Component Race and Ethnicity Element Standard.</p>	<u>EthnicityCode</u>	<u>EthnicityDescriptionText</u>	400	Hispanic/Latino Origin	450	Non Hispanic/Latino Origin
<u>EthnicityCode</u>	<u>EthnicityDescriptionText</u>						
400	Hispanic/Latino Origin						
450	Non Hispanic/Latino Origin						

	<p>If business requirements for null value specifications are to isolate the difference between a legitimate null value and a missing value, then a separate column should be defined utilizing the codes (NullCode) defined in the Compliance Component Data Element Definition Standard to add characterizations for the data when it is defined as null.</p> <p>Hispanic or Latino (of any race) would include: Mexican, Puerto Rican, Cuban, Dominican (Dominican Republic), Costa Rican, Guatemalan, Honduran, Nicaraguan, Panamanian, Salvadoran, Argentinian, Bolivian, Chilean, Colombian, Ecuadorian, Paraguayan, Peruvian, Uruguayan, Venezuelan, or Spaniard.</p> <p>Full ancestry, race, and hispanic coding schemas are available from the Census Bureau if the business requirements of the agency require it. These can be found at: http://www.census.gov/population/www/cen2000/SF4-race.html#5</p>
